#### SECTION 4. FIRST AID MEASURES

#### 4.1 Description of first aid measures

General Advice	<ul> <li>Have the product container, label or Material Safety Data Sheet with you when calling the Clayton emergency number, a poison control centre or physician, or going for treatment.</li> </ul>
Inhalation	Move the victim to fresh air. If breathing is irregular or stopped, administer artificial respiration. Keep patient warm and at rest. Call a physician or Poison Control Centre immediately.
Skin Contact	Take off all contaminated clothing immediately. Wash off immediately with plenty of water. If skin irritation persists, call a physician. Wash contaminated clothing before re-use.
Eye Contact	<ul> <li>Rinse immediately with plenty of water, also under the eyelids, for at least</li> <li>15 minutes. Remove contact lenses. Immediate medical attention is</li> <li>required.</li> </ul>
Ingestion	If swallowed, seek medical advice immediately and show this container or label. Do NOT induce vomiting.

4.2 Most important symptoms and effects, both acute and delayed Symptoms : No information available

#### 4.3 Indication of any immediate medical attention and special treatment needed

Medical advice : There is no specific antidote available. Treat symptomatically.

#### **SECTION 5. FIREFIGHTING MEASURES**

5.1 Extinguishing media
 Extinguishing media - small fires
 Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.
 Extinguishing media - large fires
 Use alcohol-resistant foam or water spray.
 Do not use a solid water stream as it may scatter and spread fire.

# **CLAYT®N**

5.2	<b>Special hazards arising from the substance or mixture</b> As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of combustion (see section 10). Exposure to decomposition products may be a hazard to health.
5.3	Advice for fire-fighters: Wear full protective clothing and self-contained breathing apparatus. Do not allow run-off from fire fighting to enter drains or water courses. Cool closed containers exposed to fire with water spray.

#### SECTION 6. ACCIDENTAL RELEASE MEASURES

6.1	Personal precautions, protective equipment and emergency procedures
	Refer to protective measures listed in sections 7 and 8.
6.2	Environmental precautions:
	Prevent further leakage or spillage if safe to do so. Do not flush into surface water or sanitary sewer system.
6.3	Methods and materials for containment and cleaning up

Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).

6.4	Reference to other sections
	Refer to protective measures listed in sections 7 and 8.
	Refer to disposal considerations listed in section 13.

#### SECTION 7. HANDLING AND STORAGE

7.1	Precautions for safe handling
	No encoial protective processing

No special protective measures against fire required. Avoid contact with skin and eyes. When using do not eat, drink or smoke. For personal protection see section 8.

#### 7.2 Conditions for safe storage, including any incompatibilities

No special storage conditions required. Keep containers tightly closed in a dry, cool and well-ventilated place. Keep out of the reach of children. Keep away from food, drink and animal feeding stuffs.

### **7.3 Specific end use(s)** Registered Crop Protection products: For proper and safe use of this product, please refer to the approval conditions laid down on the product label.

#### SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### 8.1 Control parameters

Components	Exposure limit(s)	Type of exposure limit	Source
mesotrione	10 mg/m³	8 h TWA	SYNGENTA

The following recommendations for exposure controls/personal protection are intended for the manufacture, formulation and packaging of the product.

#### 8.2 Exposure controls

Engineering Measures	: Containment and/or segregation is the most reliable technical protection measure if exposure cannot be eliminated. The extent of these protection measures depends on the actual risks in use. If airborne mists or vapours are generated, use local exhaust ventilation controls. Assess exposure and use any additional measures to keep airborne levels below any relevant exposure limit. Where necessary, seek additional occupational hygiene advice.
Protective measures	: The use of technical measures should always have priority over the use of personal protective equipment. When selecting personal protective equipment, seek appropriate professional advice. Personal protective equipment should be certified to appropriate standards.
Respiratory protection	: No personal respiratory protective equipment normally required. A particulate filter respirator may be necessary until effective technical measures are installed.
	Hand protection: Chemical resistant gloves are not usuallyrequired. Select glovesbased on the physical job requirements.
-	: If eye contact is possible, use tight-fitting chemical safety goggles. special protective equipment required. Select skin and body ased on the physical job requirements.
