Clayton Tuskar® Product Profile

Formulation

250g prothioconazole, EC formulation

Pack Size

5L

Crops

Wheat, Barley, Durum wheat, Oats, Winter rye.

Use Rate & Timings

Apply at 0.8 L/ha for a maximum of 3 treatments per crop before GS71 (wheat/durum wheat/winter rye) or apply at 0.8 L/ha for a maximum of 2 treatments per crop up to and including GS61 (barley/oats).

Fungicide timing programmes

Clayton Tuskar® is ideal for use in the main T1, T2 and T3 timing windows for Winter wheat and in the main T1 and T2 timings for Winter barley.

To manage fungicide resistance risk always follow FRAG best practice guidelines. Resistance management should be considered throughout the spray programme.

Target Diseases
